

A man in a blue suit and patterned shirt stands on a city street, smiling. The background shows a building and a blue trash can.

BUSINESS REPORT

Date: **4th February 2026**

Business Reference: **BFS00083**

About the Business:

Investment in Agricultural Equipment Distribution

A unique opportunity to join an experienced partner in the agricultural sector to import and distribute/sell agricultural products/equipment to South Africa and into Africa.

A collaborative invest model has been developed to join an industry expert to invest in agricultural tech precision equipment which cannot be manufactured in SA at a cost compared to importing equipment.

The equipment imported is focused on the sunflower / corn / vineyard / soybeans farms and the suppliers overseas can consistently supply a variety of equipment.

Besides the said equipment, strip-tills (and no strip-tills) can be supplied to the agricultural sector, plus a software app designed for precision equipment.

The proposal is that the ownership of the equipment will remain the ownership of the investor until it is sold, thus securing the investment.

The equipment will be stored in a safe warehouse until sold and then the profits will be divided between the two directors/shareholders.

The party requiring the investment has vast experience in the agricultural sector and well known and has had successful marketing initiatives at shows like Nampo etc.

Full particulars and proposals are available for an interested investor.

Finances:

The proposal is to import the first lot of agricultural equipment that is in the demand and sell that before ordering a second lot etc.

The profit on such a lot is between 35-40%, which profit will be shared between the two directors/shareholders after all costs have been deducted.

Investment required:

R5 million- the % share can be negotiated between the two parties.
