Business Reference: **BFS00264**

About the Business:

Urban Mobility Franchise Opportunity

Step into a structured urban mobility franchise opportunity within a rapidly expanding alternative transport market.

While the brand's main offices are based in the Garden Route, Western-Cape, South Africa, this franchise opportunity is not limited to this region. Subject to franchisor approval and the availability of suitable territories, new franchise operations can be established nationwide wherever there is clear demand for flexible mobility solutions. The business delivers economical, motor-assisted two-wheel transport solutions through sales, rentals, and support services, serving both private and commercial customers.

These motor-assisted bicycles can get up to 40kmpl, and require no license to be driven on our public roads.

This business for sale is designed for flexibility and growth. You can operate this urban mobility franchise opportunity from a home base or a workshop, keeping overheads low while targeting high-demand segments. Revenue streams are diversified across direct sales, short- and long-term rentals, ensuring consistent income and reducing reliance on any single market.

This opportunity reaches multiple customer segments: delivery operators, SME fleet users, students, hotels and lodges serving tourists, public hirers, and daily commuters. This broad market ensures steady, predictable, and scalable demand across your territory.

With minimal regulatory barriers, the units require no license or registration to purchase, hire, or operate. This opens a large addressable market and accelerates client onboarding, giving your franchise a competitive edge over traditional vehicle rental operations.

As a franchisee, you join a national network with established branding, supplier relationships, operational systems, and technical support. The structure is in place — your focus is growth: building your client base, optimising fleet utilisation, and capitalising on the rising demand for affordable, convenient urban mobility.

This is more than a transport business — it's a scalable, service-driven franchise positioned to thrive amid rising fuel costs, urban congestion, and growing demand for practical mobility solutions.

Included in the asking price are the 8x cycles with rear carriers and the franchise license to the value of R 201 590.
